Is the answer to higher test scores
right under your feet?

It's no secret that the right floorcovering contributes to the making of a high-performance school.

We've seen the evidence for years, and so have teachers and administrators. Carpet can improve acoustics, visual comfort, thermal comfort, even safety. And Antron® fiber carpets have performance advantages that translate into significant cost savings and learning gains compared to schools with alternative flooring choices. We thought you'd like to know.

We can't quiet all the
feedback and interference you get

but a 20-decibel drop in ambient noise is a great start.

A high-performance carpet of Antron® fiber can cut out a lot of sound reverberation and noise. Its exceptional sound-absorbing qualities create a more quiet and comfortable environment for students and teachers alike. Focusing concentration. Amplifying learning. And the shock-absorbing qualities of carpet help reduce the chance of injury from slips and falls, compared to hard surfaces. Giving you **one less thing to worry about.**

Earn extra credit year after year.

The right foundation for learning pays dividends over a lifetime.

In a world of shrinking budgets, providing students with what they need is getting harder and harder. So consider one asset that offers you "extra credit" year after year – carpet of Antron® fiber. Compared with hard-surface and other flooring choices, carpets of Antron® fiber have a lower total cost of ownership, dramatically reducing labor and maintenance costs over time. That leaves more dollars for technology, textbooks and other fast-depreciating assets that will need replacing **long before your carpet does.**

With 40 years experience in the classroom

we're ready to apply for the job.

Antron® carpet fiber has excelled in schools across the country for 20, 30, even 40+ years. But more important than the longevity of any one carpet is our ongoing commitment to engineering fibers that can stand up to the grit and grime your young charges bring in the door. (Snow, sand, mud, paint and more.) So when your Antron® Fiber Consultant calls you in the days ahead, consider how we can help. Whatever challenges you're facing, we're experienced, eager and ready to **apply ourselves to the job.**
